

COURSE CLASSIFICATION FORM

Course Number/Name		STAT 203 Probability I	
Prepared by		Dr. Ahmed Elmoasry	
Program Learning Outcomes	Levels* (0,1,2, 3,4,5)	Relevant Activities	Assessment Methods/Metrics
a1. Apply fundamentals and concepts of mathematics.	5	Lectures, Assignments,	project
a2. Apply fundamentals and concepts General sciences and	4	Assignments on creativity dealing with	Lectures, Quizzes, Homework, Exam
a3. Realize Social and ethical values	3	Design project; Lectures and assignments	project
b1. Read and construct mathematical arguments and proofs		Design project;	Project, Lectures, Quizzes, Homework, Exam
b2. Apply critical thinking skills to solve problems that can be modeled mathematically.	5	Lectures and assignments.	project
c1. Work independently and within teams	4	Design project Home works	project
c2. Bear responsibility for different situations	3	Design project in which students demonstrate basic	project
c3. Realize codes of ethics and their importance.	5	Design project; Lectures	Lectures, Quizzes, Homework, Exam
d1. Communicate a depth and breadth of mathematical knowledge, both orally and in writing	4	Design project in which students show ability to apply principles of Mathematical and Statistical data	project
d2. Ability to Organize, connect and communicate mathematical and algorithmic ideas	3	Design project; Lectures and assignments	Project, Lectures, Quizzes, Homework, Exam
d3. Critically interpret numerical and graphical data.	5	Design project; Lectures and assignments	project
e1. Use computer and its applications as an office tool	4	Lectures and oral discussions on identification of the	project

* Please mark (or type) High (5), Medium-High (4), Medium (3), Low-Medium (2), Low (1) or Not At All (0) indicating the level to which you believe, as an instructor, the students have achieved these outcomes in this course.

Course Objectives and Outcomes

Course Number: STAT 203 Course Name: Probability I

Prepared by: Dr. Ahmed Elmoasry

Table 1: Relationship of course objectives/outcomes with PLO and ASIIN Criteria

Course Objectives:	Course Outcomes:	ASIIN	PLO
1. This course is designed to follow on from, and reinforce, A level mathematics.	1. solve complex problems in Probability.	c	a
	2. Apply knowledge, as needed, to design a satisfactory system to achieve a final successful project.	c, e	a
2. To build a logical structure on probabilistic intuition, and to cover such peaks of the subject as the Strong Law of Large Numbers as well as more modern topics.	1. have a systematic and coherent understanding of <u>theoretical mathematics in the field of Probability</u>	c, e	A,b
	2. Synthesize information that the team gathers to solve open-ended problems.	e	A,b
	3. Conceptualize alternative concepts, evaluate alternatives, select preferred alternative, and <u>implement the preferred project</u>	c, e	A,b
3. The emphasis is upon the understanding of real-life statistical problems, and develops the basic concepts and statistical methods by example.	1. have acquired coherent body of knowledge of these subjects demonstrated through one or more of the following topic areas: Probability as a measure. Random variables. Convergence Theorems. Probability under partial information. Applications of Probability. 2. students will have basic mathematical skills in : Modeling, computation 3. students will have basic skills in exploratory data analysis.	a, c	B,c
4. Broaden skills in team work, critical thinking, communication, planning and scheduling through design project	1. Learn successful group interaction for a project	d, g	C,d
	2. Produce final design report as part of their deliverable	g	C,d
	3. Deliver a final oral presentation for their project.	g	C,d
5. Enable students to consider safety, ethical, legal, and other societal constraints in execution of their design projects	1. Understand environmental and legal issues	h	d
	2. Understand the importance of professional and ethical	f	d
	3. Understand the impact of aesthetic and human aspects	h	d
	4. Select from standard tables and catalogues machine elements, components and materials given appropriate performance requirements	c	e

Course Objectives and Outcomes

Table 2: Methods of assessment of course syllabus

Assessment Method	Number/Type				Instructor Assessed	TA/Grader Assessed	Peer/Self Assessed
Homework	5 homework assignments				x		
Mid Terms/Final Exams	2 mid-term; 1 final exam				x		
Quizzes	One biweekly				x		
Individual Projects	1-2 wks	3-4 wks	1/2 sem	Full sem			
Team Projects	1-2 wks	3-4 wks x	1/2 sem	Full sem x	x		x
Lab Assignments							
Computer Assignments							
Computer Tools Used							
Oral Presentations	one				x		x
Written Reports	one				x		
Other	Design project (project binder)				x

d1. Communicate a depth and breadth of mathematical knowledge, both orally and in writing.	Design project in which students show ability to apply principles of Mathematical and Statistical data						
d2. Ability to Organize, connect and communicate mathematical and algorithmic ideas.	Design project; Lectures and assignments						
d3. Critically interpret numerical and graphical data.	Design project; Lectures and assignments						
e1. Use computer and its applications as an office tool	Lectures and oral discussions on identification of the project goals and constraints						

Instructor Course Evaluation Form

II. Catalog Description , and Course Prerequisites Evaluations:

Based on your experiences in the course, please respond by circling the most appropriate number. Circle N/A for items that are not applicable, or if you have no opinion.

Catalog Description 1434-1435	Random vectors – Bivariate distributions Joint probability mass function , joint probability density function, Independence , conditional distributions, Expectation, Covariance, Correlation Coefficient, Variance of sum or difference of two random variables and the Moment Generating Functions of Bivariate Random Variables)					
	Random samples – Distribution of sample mean – Law of large numbers – Central limit theorem – Elementary statistical Inference - (estimation theory) –Methods and properties of point estimation - MLE .					
Course Prerequisites:	STAT 202		Circle One (5=Strongly Agree; 1=Strongly disagree)			
2a. Do you believe that the catalog description (above) is accurate for this course?	5	4	3	2	1	N/A
2b. Do you believe that the course prerequisites (above) are appropriate for this course?	5	4	3	2	1	N/A
2c. If not, please list any prerequisites you believe are not appropriate for this course.						

III. Textbook(s) and/or Lab Manuals (if applicable) Evaluations:

Textbook(s) and/or Lab Manuals (if applicable):	<ul style="list-style-type: none"> • D.C. Montgomery & G. C. Runger. Applied Statistics and Probability. 3rd edition.2003. • Probability and Statistics . Schaum's Outline Series. 		Circle One (5=Strongly Agree; 1=Strongly Disagree)			
3a. In general, do you believe this to be an appropriate textbook for this course?	5	4	3	2	1	N/A
3b. Was the organization of the textbook appropriate for this course?	5	4	3	2	1	N/A
3c. Was the level of the textbook appropriate for this course?	5	4	3	2	1	N/A

IV. Computer usage (if applicable) Evaluations:

Computer usage (if applicable):		Circle One (5=Strongly Agree; 1=Strongly Disagree)				
4a. Was the use of computer well integrated with the course?	5	4	3	2	1	N/A
4b. Was the computer lab adequately equipped with well-maintained and updated computers?	5	4	3	2	1	N/A
4c. Was the computer lab equipped with sufficient number of computers?	5	4	3	2	1	N/A
4d. Were the special software packages (MATLAB, SPSS, C+, FORTRAN, etc) available and accessible?	5	4	3	2	1	N/A
4e. Was adequate technical support available when needed?	5	4	3	2	1	N/A
