Ovid Lippincott Williams & Wilkins

### KSMC 2011

There are numerous studies that have outlined the significant impact of having clinically relevant information available, the positive impact of clinical outcomes and the quality of patient care.

We have selected a number of such studies for you:

#### • Article 1-

- Addressing information requirements for doctors and residents
- Conclusion:

Health

 Studies have repeatedly shown that clinicians have significant informational needs that are not met in their practices. Researchers estimate that although one clinical question arises per patient visit, as many as 70% of these questions go unanswered.

3

The Benefits of Having Online Medical Information Available at the Point-of-Care

### • Article 2

- Case studies of how accessing information was critical to patient care decisions
- Conclusion (1 case example):
- During the repair procedure [elibrary content] was searched using the terms "mitral regurgitation" and "Perimount." Reassurance was obtained by review of the publication by Firstenberg et al., (7) which stated that mild central regurgitation in this valve immediately postoperatively was a benign finding.

#### • Article 3

- Demonstrating the value of a Health Science Library from one that was considering cutting content
- Conclusion:
- Results of this study substantiated previous research showing that health sciences LIS contributes to patient health care. Feedback also demonstrated other areas where LIS contributes to the mission and goals of the organization and how these align themselves with Abels et al.'s taxonomy.

Does online content help experienced doctors answer clinical questions?

- Artcle 4
- A study showing the correlation between clinician performance and having information VS. not having it
- Conclusion:

Health

 System use resulted in 21% improvement in clinician's answers.

- Document 5
- Myths and truths about library services
- Conclusion:

Health

 Research has shown that libraries improve patient care

#### Document 6

- The Rochester study on the impact of the hospital library on clinical decision making
- Conclusion:
- The Rochester study asked whether the information provided by the library saved the physician time, and 84.7% agreed that this was the case. As a result of the information received from the library, 80% of the physicians indicated that they probably (48.0%) or definitely (32.4%) handled some aspect of the clinical situation differently than they would have handled it otherwise.

Databases

Ovid Wolters Kluwer 9 Lippincott Williams & Wilkins

### Journals - What to Look For

- Quality content
- Current content

- As much available content as possible
- Cost effective solutions
- Efficient methods of search

# Why Databases@Ovid?

#### Content

- $\succ$  More than 100 core and niche databases—from MEDLINE®, PsycINFO®, and Embase® to AMED, HaPI, and Maternity and Infant Care
- $\succ$  Archive access: BIOSIS Archive, CAB Abstracts Archive, Embase Classic, Global Health Archive, Inspec Archive, Zoological Record Archive

#### Features

- Customizable links to all available full-text holdings. Easily integrate your Databases@Ovid resources with your institution's Ovid and non-Ovid bibliographic and full-text content
- Saved searches delivered via RSS feed or AutoAlert email
- > Ovid Jumpstarts—email "shortcuts" that take users directly into a specific point in a database

# Why Journals@Ovid? LWW Total Access

#### Quality Content

- > Seemless access to 280 premier journals, essential to any medical institution
- > Many journals are "official" titles of prestigious societies and associations

#### Current Content

- $\succ$  No journals in the collection are under any embargoes
- Get access to critical content from selected journals before they are available in print

#### • As much available content as possible

A la carte journals can be added to refine your collection at any time. Choose from hundreds of titles

### Cost effective solutions

> Total Access offers reduced savings vs. the purchase of individual titles

### • Efficient methods of search

> OvidSP

Wolters Kluwer

# Why Books@Ovid?

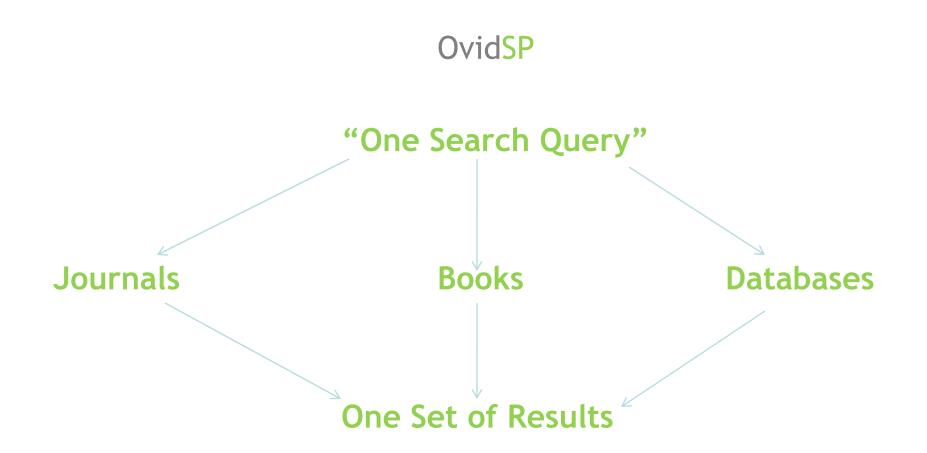

#### Content

- More than 3,000 current, online textbook editions from the world's most prestigious scholarly publishers, including one of the largest selections of core clinical ebooks.
- Resources from Lippincott Williams & Wilkins, Oxford University Press, Clinical Publishing, Jones and Bartlett, John Wiley, Springer Science+Business Media, and other major publishers

#### Flexible Solutions

- Subscription or purchase
- Collections
- A la carte
