The National Commission for Academic Accreditation & Assessment

Course REPORT (CR)

Artificial Intelligence (CSI 411) Dr. Mahdi Jemmali

A separate Course Report (CR) should be submitted for every course and for each section or campus location where the course is taught, even if the course is taught by the same person. Each CR is to be completed by the course instructor at the end of each course and given to the program coordinator

A combined, comprehensive CR should be prepared by the course coordinator and the separate location reports are to be attached.

Course Report

For guidance on the completion of this template refer to the NCAAA handbooks or the NCAAA Accreditation System help buttons.

4. Student Grade Achievement Verification (eg. cross-check of grade validity by independent evaluator).

| Method(s) of Verification | Conclusion |
|---|-------------------------------------|
| - Students grades was double checked by an internal committee from our department which consists of 2 members each. | The results are verified and valid. |

D. Resources and Facilities

| 1. Difficulties in access to resources or facilities (if any) | 2. Consequences of any difficulties experienced for student learning in the course. | |
|---|---|--|
| - No difficulties were found | | |

E. Administrative Issues

F Course Evaluation

- 1 Student evaluation of the course (Attach survey results report)
 - Attached
- a. List the most important recommendations for improvement and strengths
- The focus on algorithms development
- Conduct case studies in different related topics of AI

|------|----------|---------------|----------------|---------------|---------|

The instructor will guide the process of knowledge gaining by preparing some case studies and by providing students with the needed and suitable contents.

- 2. Other Evaluation (e.g. by head of department, peer observations, accreditation review, other stakeholders)
- a. List the most important recommendations for improvement and strengths
 - Promote the knowledge of AI by motivating students to think, design and develop small projects for AI applications. This is great since this course is studied by computer science and information students.
- b. Response of instructor or course team to this evaluation
- Instructor is aware of the evaluation and they will be taking into account for next semester improvements. In addition, contents and materials needed for improvements will be handled by the instructor or course team.

G. Planning for Improvement
