

## Majmaah University Deanship of Quality and Skills Development

College: Zulfi Education College Department: Chemistry

Code MUP16

Program and module learning outcomes

**CHEM421: Module Code** 

Sudents will have a knowledge about the basic concepts of natural products, their importance, medical uses, methods of extraction and identifying them, with more focus on the natural	1
plant products . Students should be able to classify the different types of natural products.	
Students comprhend the different structural compositions of natural products, their classification according to different theories. In addition, students should be able to distinguish between the different structural compositions of different groups.	2
Students know the vital metabolic processes by which natural products are consisted such as secondary metabolism products and some of their interactions	3
The student has the ability to discuss scientifically the theoretical concepts of natural products	4
Students will develop their thinking skills and their ability to use information and concepts of natural products chemistry in real life.	5
Students acquire creative and analytical thinking skills, the ability to analyse and interpret results and the ability to evaluate data in the dyes chemistry field.	6
Students practice conversational skills, effective influence and group leading. Students, also, should be able to be responsible for their own learning.	7
Students master communication skills - both oral and in written, be able to perform calculations, to use computer technology in the field of dyes and prepare and give presentations.	8
