

This department has been recently established, as it was established nearly last year. Such department is considered a distinguished mark comparing to other colleges of medicine in the Kingdom. Despite of its academic and scientific value, this department is under the supervision of other departments . This department was chaired by Dr. Ahmed Alshaya in the academic year 1434-1435 H and then he was succeeded by Dr. Islam Shousha in 1435-1436 h

### **The Department Council**

.It consists of six consultants who are specialized in this field for both kids and adults

.The department is currently updated the courses of the intensive care

The department is working seriously to recruit the young Saudi cadres and send brilliant students for studying abroad and professional doctors as well in order to enhance the medical and academic status in college and university
