Module Title:	Electromagnetism 2	
Module ID:	PHYS 3222	
Prerequisite:	PHYS 2212	
Co-requisite:	--	
Course Level:	Sixth	
Credit Hours:	3 (3+0+0)	

Module Description

وصف المقرر :

The aim of this module is a survey of the basic electromagnetic phenomena, such as: Electromagnetic induction; Faraday's and Lenz's laws; transformer and motional electromotive force; induction heating; transformer; displacement current; time-varying fields; Maxwell's equations; wave equations; time-harmonic fields; complex phasors; scalar and vector potential functions; plane waves in vacuum; plane waves in dielectrics and conductors; polarization; skin effect; electromagnetic energy and power; Poynting's theorem; reflection and refraction of plane waves at dielectric interfaces; Snell's laws; Fresnel formulas; critical angle; total internal reflection; total transmission; Brewster's angle; standing waves; transmission line theory; TEM waves; transmission line parameters; loss and lossless lines; matching of transmission lines to their loads.

Module Aims

أهداف المقرر :

1	Electrostatic fields	1
2	Magnetostatic fields	2
3	Introduction to Electrodynamics	3
4	Maxwell equations	4
5	Electromagnetic plane wave propagation.	5
6	Electromagnetic radiations and transmission line theory	6

Learning Outcomes:

مخرجات التعليم:

1	Students will become know the basic laws of electromagnetism and its related concepts, for stationary and moved charges.	1
2	Students will become more familiar with fundamental theory of electrodynamics.	2
3	Students will learn the basic applications of Maxwell's equations.	3
4	Students will learn basic properties of electromagnetic plane waves.	4
5	Students will learn basic transmission line theory.	5

Course Contents:

محتوى المقرر:

ساعات التدريس (Hours)	عدد الأسابيع (Weeks)	قائمة الموضوعات (Subjects)
6	2	Recall to: Electric field, electric force, magnetic field, magnetic force, Lorentz force, Ohm's Law, Ampere's Law, Magnetic flux.
6	2	Electromotive force, electromagnetic induction, Farady's Law, Lenz Law.
3	1	Induced electric field, Inductance, Energy stored in magnetic fields, Energy stored in electric fields, electromagnetic density.
6	2	Maxwell's equations in vacuum, Maxwell's equations in dielectric, Maxwell's equations in conductor, Maxwell's equations in plasma.
6	2	Electromagnetic wave propagation, Poynting's theorem, Newton's third law in electrodynamics and momentum,
9	3	Electromagnetic waves in vacuum, Monochromatic plane waves, Energy and momentum in electromagnetic waves, Electromagnetic waves in matter, Propagation in linear media, Reflection and transmission at normal incidence, Reflection and transmission at oblique incidence, Absorption and dispersion.
6	2	Guided waves and wave guides, Transversal electric waves in a rectangular wave guide, The coaxial transmission lines, Electric dipole radiation.
