#### 4. Course General Description:

This course aims primarily to train students to develop good and effective speaking and listening skills. They will be trained to speak and listen actively and effectively for different purposes and in different social contexts. A wide range of speaking and listening strategies will be continuously described and emphasized throughout the course. English is a global language and students will be exposed to a variety of native and nonnative English accents. What is more, they will be trained to speak clearly, expressively and intelligibly to a wide range of English speakers and users (of various accents and cultural backgrounds). The course utilizes vast and varied audio and video-taped materials (multimodal materials) taught with a view to integrate listening and speaking with other major language skills (reading and writing). The Videos and audios will particularly help to train students on stress and connected speech features (intonation, assimilation, rhythm, etc.).

Additionally, A wide range of speaking tasks have been designed which engaged the learners in individual speaking, dialogues in pairs, group discussions and role-play. Focus is also on preparing the students for language proficiency tests such as IELTS and iBT TOEFL tests.

Instructors are required to keep updated and to be context-sensitive, flexible, dynamic and to vary both teaching and evaluation strategies (integrating teaching and testing). Although the Interactions series is currently used in the course, this can change or may be supplemented by any other materials (materials selection or collation depends largely on the course philosophy, aims and outcomes).
