As directed by HE the Rector, the deanship aims to develop an application as a part of e-transactions system at the university to manage and facilitate dealing with committees and councils of the University in accordance to specified mechanisms. So, a particular system has been launched in two phases:

1. Phase I: all the standing committees at the university - living environment
2. Phase II: all colleges' boards - ready for release

The system of committees and councils is a successful project carried out by the deanship of e-learning and distance learning, which aims to develop and standardize procedures for academic work and expedite decision-making mechanism, where the system coordinates and follow up electronically the task of the committees by distributing roles between the staff of the committees in each of its meetings by facilitating standardized procedures to deal with the construction and preparation of records and providing a clear schedule for the meetings of the Committee and issues as well as the provision of materials and documents electronically, besides, solving the problem of geographical spacing among the branches of the university and providing multiple data for decision-making.
