

Course Specifications

Muharram 1437 H

| | |
|--------------------------------------|--|
| Institution: | Majmaah University /College of Engineering |
| Academic Department : | Electrical Engineering. |
| Programme : | Electrical engineering |
| Course : | Applied Control |
| Course Coordinator : | |
| Programme Coordinator : | |
| Course Specification Approved Date : | / ... / H |

A. Course Identification and General Information

| | | | |
|--|---|------------------|---------|
| 1 - Course title : | Applied Control | Course Code: | EE 475. |
| 2. Credit hours : | 3 | | |
| 3 - Program(s) in which the course is offered: | Electrical Engineering, Power and machine track | | |
| 4 – Course Language : | English | | |
| 5 - Name of faculty member responsible for the course: | | | |
| 6 - Level/year at which this course is offered : | Fall semester, senior year | | |
| 7 - Pre-requisites for this course: | Automatic Control Systems EE 341 | | |
| 8 - Co-requisites for this course : | None | | |
| 9 - Location if not on main campus : | College of Engineering | | |
| 10 - Mode of Instruction (mark all that apply) | | | |
| A - Traditional classroom | <input checked="" type="checkbox"/> | What percentage? | 100 % |
| B - Blended (traditional and online) | <input type="checkbox"/> | What percentage? | % |
| D - e-learning | <input type="checkbox"/> | What percentage? | % |
| E - Correspondence | <input type="checkbox"/> | What percentage? | % |
| F - Other | <input type="checkbox"/> | What percentage? | % |
| Comments : | | | |

B Objectives

| |
|--|
| <p>What is the main purpose for this course?</p> <p>The main objectives of this course are:</p> <ul style="list-style-type: none"> - Acquainting the students the ability of dealing with the fundamentals of feedback control systems. - Acquainting the students the ability to obtain mathematical models of applied control systems. - Teaching the students the basic requirements of control systems design and implementation aspects. - Acquainting the students the ability to obtain and judge the performance of control systems in time and frequency domains. - Enabling the students to handle and master the design of PID controller. |
| <p>Briefly describe any plans for developing and improving the course that are being implemented :</p> <ul style="list-style-type: none"> - Apply modern techniques and tools to simulate electrical power electronics |

circuits.

- Use software such as Matlab to design power electronics circuits.

C. Course Description

1. Topics to be Covered

| List of Topics | No. of Weeks | Contact Hours |
|--|--------------|---------------|
| Introduction to control systems and their classifications | 1 | 4 |
| Advantages of using feedback in control systems. | 1 | 4 |
| Basics of system modeling and analysis. | 1 | 4 |
| Examples of applied control systems: speed control system | 1 | 4 |
| Temperature control system, liquid-level control system | 1 | 4 |
| State-space models. Derivation of state-space model from transfer function and vice versa | 1 | 4 |
| Time response of state-space model | 1 | 4 |
| Transient response characteristics. | 1 | 4 |
| Classifications of industrial controllers | 1 | 4 |
| Automatic controller | 1 | 4 |
| Basics of PID controller. | 1 | 4 |
| PID controller design methods | 1 | 4 |
| Transducers and actuators | 1 | 4 |
| Control applications in power systems: turbine-governor control | 1 | 4 |
| Control applications in power systems: generator voltage control, and load frequency control | 1 | 4 |

2. Course components (total contact hours and credits per semester):

| | Lecture | Tutorial | Laboratory | Practical | Other: | Total |
|----------------------|------------|------------|------------|-----------|----------|-------|
| Contact Hours | 45. | 15. | 0 | 0 | 0 | 60 |
| Credit | 3 | 0 | 0 | 0 | 0 | 3 |

3. Additional private study/learning hours expected for students per week.

6

4. Course Learning Outcomes in NQF Domains of Learning and Alignment with Assessment Methods and Teaching Strategy

| | NQF Learning Domains And Course Learning Outcomes | Course Teaching Strategies | Course Assessment Methods |
|------------|---|---|--|
| 1.0 | Knowledge | | |
| 1.1 | | | |
| 1.2 | | | |
| 1.3 | The ability to recall, understand, and present information, including knowledge of specific facts, knowledge of concepts, principles and theories, and knowledge of procedures | Lecture, debate, small group work, whole group and small group discussion, research activities, lab demonstrations, projects, debates, role playing, case studies, memorization and individual presentation | Standardized exams, Seminars and Assignments. |
| 2.0 | Cognitive Skills | | |
| 2.1 | | | |
| 2.2 | | | |
| 2.3 | An ability to identify, formulate, and solve engineering problems | Lecture, small group work, , research activities, lab demonstrations, projects and individual presentation. | Standardized exams, oral exams, micro projects |
| 2.4 | The ability to analyze, designs, and implement systems. | Lecture, small group work, , research activities, lab demonstrations, | Standardized exams, oral exams, micro projects |

| | NQF Learning Domains And Course Learning Outcomes | Course Teaching Strategies | Course Assessment Methods |
|------------|--|--|--|
| | | projects and individual presentation. | |
| 2.5 | | | |
| 2.6 | | | |
| 3.0 | Interpersonal Skills & Responsibility | | |
| 3.1 | | | |
| 3.2 | | | |
| 3.3 | | | |
| 3.4 | | | |
| 3.5 | | | |
| 3.6 | | | |
| 4.0 | Communication, Information Technology, Numerical | | |
| 4.1 | An ability to apply knowledge of mathematics, science, and engineering | Lecture, research activities, lab demonstrations, projects, case studies, memorization and individual presentation | Standardized exams, oral exams, micro projects |
| 4.2 | | | |
| 4.3 | An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice | Lecture, research activities, lab demonstrations, projects, case studies, memorization and individual presentation | Exams, quizzes and reports |
| 4.4 | The ability to utilize statistics/probability, transform methods, discrete mathematics, or applied differential equations in support of | Lecture, research activities, lab | Standardized exams, oral exams, |

| | NQF Learning Domains And Course Learning Outcomes | Course Teaching Strategies | Course Assessment Methods |
|-----|--|--|---------------------------------|
| | electrical systems | demonstrations, projects, case studies, memorization and individual presentation | micro projects |
| 4.5 | | | |
| 4.6 | | | |
| 5.0 | Psychomotor | | |
| 5.1 | | | |
| 5.2 | | | |
| 5.3 | | | |
| 5.4 | | | |
| 5.5 | | | |
| 5.6 | | | |

5. Schedule of Assessment Tasks for Students During the Semester:

| | Assessment task | Week Due | Proportion of Total Assessment |
|---|----------------------------|--|--------------------------------------|
| 1 | Homework and micro project | 3 rd , 5 th , 9 th and 12 th | 10% |
| 2 | Quizzes | 4 th , 7 th , 11 th and 13 th | 10% |
| 3 | Exams (First and Second). | 6 th and 10 th | 40% (20% each) |
| 4 | Final Exam | 16 th | 40% |

D. Student Academic Counseling and Support

1. Arrangements for availability of faculty and teaching staff for individual student consultations and academic advice. (include amount of time teaching staff are expected to be available each week) Four office hours are dedicated for student in each week.

E. Learning Resources

1. List Required Textbooks :

- R.C.Dorf and R.H. Bishop, Modern Control Systems, Prentice Hall,

| |
|---|
| New York, 1998. York, 1997 |
| 2. List Essential References Materials: (Journals, Reports, etc.) <ul style="list-style-type: none">• C. W. Lander, Power Electronics, McGraw-Hill, London, 1993. |
| 3. List Recommended Textbooks and Reference Material : <ul style="list-style-type: none">• K. Ogata, Modern Control Engineering, Prentice Hall, New York, 1997 |
| 4. List Electronic Materials : None |
| 5. Other learning material : <ul style="list-style-type: none">• Computer-based programs/CD.• Professional standards or regulations and software. |

F. Facilities Required

| |
|---|
| 1. Accommodation None |
| 2. Computing resources (AV, data show, Smart Board, software, etc) A laptop for the instructor. |
| 3. Other resources None |

G Course Evaluation and Improvement Processes

| |
|--|
| 1 Strategies for Obtaining Student Feedback on Effectiveness of Teaching: <ul style="list-style-type: none">• Completion course evaluation questionnaire,• Classroom observations to measure student behavior through how well the student groups are interacting in-class activity and how well the in-class activity went. |
| 2 Other Strategies for Evaluation of Teaching by the Program/Department Instructor Faculty Peer Assessment |
| 3 Processes for Improvement of Teaching : <ol style="list-style-type: none">1. Plan: The instructor will develop a strategy for teaching.2. Do: The strategy will be implemented for one semester.3. Study: The experiences of the students will be collected through a survey.4. Act: Effective teaching strategies will be implemented and revised as more experiences are gained. |
| 4. Processes for Verifying Standards of Student Achievement Check marking of a sample of examination papers |
| 5 Describe the planning arrangements for periodically reviewing course |

effectiveness and planning for improvement :

- 1. Continuous improvement is a circular process, encompassing student assessment, course planning and design, implementation, evaluation, and revision.**
- 2. A feedback from all relevant assessment tools must be considered in the continuous process of course objectives refinement and assessment.**
- 3. Continuous process for reviewing feedback from student on the quality of the course and planning for improvement**
