Civil Engineering Program

CE Mission: To provide excellent engineering education conducive to talent and creativity based on scientific knowledge, state of the art research and expertise to serve the community in a professional and ethical manner

		Excellent engineering education	Talented and creative engineers	High quality of knowledge, state of the art research	Serve the community	Professional and ethical manner
Program Objectives	1. Provide latest engineering education and state of the art research					
	2. Demonstrate graduates commitment to life-long learning					
	3. Produce graduates of high quality engineering skills of ethical and professional standards					
	4. To educate students to take leadership roles in identifying emerging issues					
	5. Encourage graduates in private and public activities					

(KW) Program Mission keywords

CE Program Objectives:

1	To provide latest engineering education and state of the art research to solve important civil engineering problems and address technological challenges of the future.
2	To produce graduates to demonstrate commitment to lifelong learning and professional development through seeking professional licensure, pursuing higher studies, and participating in certified continuing education activities.
3	To produce graduates of high quality engineering skills of ethical and professional standards to develop safe, efficient and environment friendly civil engineering projects and designs.
4	To educate students to take leadership roles in identifying emerging issues of the community and to develop innovative solutions to the engineering challenges.
5	Encourage graduates in private and public activities to achieve consolidated progression in their careers by participating in skilled continuing education activities.
